How Many Kinds of Love Are There?

- SPIRITUAL.—Far removed from all things earthly: a thing of the spirit alone; saint-like and calm but capable, none the less, of tremendous emotional depths. In this manner Dom Claude loved
- SENSUAL.—Seeking all and giving nothing; a guileful passion bearing the taint of lust; avid—hungry—masking evil beneath a coat of treachery. It was thus that Jehan loved Esmeralda.
- SELF-SACRIFICING.—The love of a man for his mate; the love which came ere Time began, to live for evermore; gilding the world for those who know its spell; the love of Phoebus for Esmeralds.
- SENTIMENTAL.—Fragile and delicately-fibred; twanging a golden lute beneath a silver moon; all made of sighs and sonnets, and soft, silken sounds. So, to his undoing, Gringoire loved Esmeralda.
- SHIELDING.—Fiercely protective; akin to the love of some jungle creature for its offspring; ready to slay in defense of the one beloved. This was the love that Clopin bore for Esmeralda.
- SUPREME.—Greater love hath no man than this; unquestioning, unswerving, loyal and true; saking nothing and finding fulfillment in service; perfect. So it was that Quasimodo loved Emeralda.

LITTLE woolly blankets—how soft and fluffy they must be kept for the Baby. And linen, and fine raiment - they must not chafe or irritate his tender skin:

must not chale or irritate his tender skin:

Baby's bedding must be washed as

THE WEATHER
The weather is a thing we
Could never do without
It's something all society
Can safely talk about.

It has no friend to answer back Or even wear a scowl, No one your judgment will attack If you should call it foul.

If of the weather you should tel.
The very worst you know,
And prove your dreadful tale as

No little woman's face would pale, No wounded man reply That you had crushed him with your tale Or stabbed him with a lie.

So who when to gossip you're inclined, When something you'd abuse The weather, not your fellow kind, Is always safe jo use.

"In winter I want plenty of cover can't alcop when I'm cold," sai

"Well, I usually want plenty overs too; but I can't say I c nuch for a shoot of ice nor ablar of anow," replied Brown.

TUBERCULAR MEAT

The following letter in regard t will doubtless throw some light on a situation that has vexed the people of Belleville since reading Dr. Act-crill's letter regarding sale of such meat here.

The writer evidently knows his subject and follows a "plain English" method of outlining his viewpoint.

Twould like to and a few worst to Dr. Ackerill's letter of protest against the sale, recently, of tuber-calar meas on the Market Square: I have made inquiries into the matter of meat inspection and the following facts will no doubt be iteresting to one who has to buy meat for table. Under the Meat and sed Foods Act, the Departmen of Agriculture, Ottawa, place inspectors at all large abbatoirs throughout the country, who, at the time of the killing, reject any carcass that they regard as unfit for human consump-

But if the ani-mal is poor-looking, emaciated, or mal is poor-looking, emaciated, or badly diseased the careass is reject ed absolutely and is not permitted to be put on the market.

"That inspection protects those to buy meat that has been purchar ed from the large soat so from the many appelling of the carcasers that are killed and brought into the THREE BAVARIAN including to histor an uncurupleus blocker or family from killing and I FADERS RIAMED buthing to history buthing any buthing rolling any buthing or faring from killing any diseased animal (there are other diseased animal (there are other foreign) and cuttling it up, and bring-Defendants In "Puttich" Action Declares They Were Double Crossed ber that even though we have a med-ical Officer of Health and a food in-spector here, it is of very little use to examine meat, unless the liver and lungs, etc., are present.

CARNATION Milk costs about the same as ordinary milk. But think of its convenience, its purity and its richness! Serve just as it comes from the can in place of cream for coffee, fruits and cereals. For all milk purposes add a little more than an equal amount of water. Carnation keeps indefinitely in the can until opened and for several days after opening if properly stored, so there is no waste. It adds richness and flavor to any dish.

Carnation is just pure fresh milk, evaporated to double richness, kept safe by sterilization. Order several tall (16 oz.) cans or a case of 48 cans from your grocer.

Try this recipe and write for the Free Carnation Recipe Book containing many others just as delicious.

All your Blood must pass through your Kidneys

EVERY three minutes, all the blood in the body passes through the kidneys. They are the blood filters of the body.

The kindneys. They are the blood filters of the body. Should the kidneys become clogged or inflamed, they cease to function and allow impurities to be carried back into the body. The skin then loses its healthy color, the appetite falis, and usually there is a dull or acute pain in the back in the region of the kidneys. Headaches, black spots floating before the eyes, puffiness beneath the eyes, swollen joints and burning urine are also symptoms of kidney troubles.

Should you have pains of this description, accompanied by lassitude, then you may be certain that your kidneys are not functioning properly, and you should at once take a simple and effective remedy to stimulate and correct their action.

OTTAWA

TTAWA, the political centre of Canada, and pro-phetically designated by the late Earl Grey as the possible centre of the British Empire of the future, never detarmed of the brilliant desirnju is store for it when the Bank of Montreal established a Branch there 81 years ago. Canada at that time was in many respects a terra incognite, consisting of half a dozen provinces with differing laws, tariffs and currencies. And Ottawa was only a lively little lumber camp called Bytown.

Today Ottawa is not only the name of a beautiful city, but is also a synonym for the voice of a nation—like Downing Street and the Quai d'Opay.

The name of the Bank of Montreal, too, has enlarged in signific in the intervening years. It is now recognized as the title of a na-wide institution ranking among the leading banks of the world.

Gum Chewing Aids the Teeth

You have the authority of doctors and dentists for this statement. Your own experience will prove it, if you will use WRIGLEY'S after every meal.

The following quotations from a recent work on teeth and health are worth remembering:

"Dentits have found that the exercise of gum chewing brings about a better nutrition of the teeth "
"The cleansing action of the gum between the teeth helps to keep them free from the particles which lodge in the crevices and cause decay."

The busy man—or woman either—rarely has time to clean the teeth after eating. Yet they should be cleaned, and

after every meal

will do it. Also it will aid digestion and furnish welcome refreshment to mouth and throat.

Telephone Girls Sell Goods

d

OME Canadian stores make a practice of showing advertised bargains first to their own telephone sales girls. When cus-tomers call, the sales girls are in a position to answer questions about the goods; to recommend them from personal knowledge; and to take orders for them.

Each telephone, sales girl is designated by a number, so customers can always order through the same employee if they wish. This make, selling by belephone as personal a service is over-the-counter selling. Storeldepers say, the i results are even more satisfactory,

So successfully does the plan work that some of the largest New York stores sent a committee to Canada to investigate and copy it.

May we help you make a beginning with this modern method of increasing sales?

How. can you tell if your eves are normal?

The answer is that you can't do it yourself. The only known way to learn this is to have your eyes throughly 'examined by the Optometrist. We, among others, can do that for you. Then we can supply you with glasses that will give you as nextly normal vision as possible. That ought to be of interest to you.

Give the children WRIGLEY'S after every meal

A prominent physician says: "It is surprising how free from decay the teeth can be kept by using gum after each meal."

You know how hard it is to get the children to clean their teeth. By giving them WRIGLEY'S you not only reward them for clean-ing their teeth, but the reward is actually the means of performing this important service!

WRIGLEY'S aids digestion too, and acts as an antiseptic wash for the mouth and throat: Several flavors-all of
